Desarrollador de Software en Redtrust

Caldes de Montbui, Cataluña, España

Extracto

En Redtrust, mi enfoque se centra en el desarrollo backend, aplicando mis conocimientos en C# y el marco .NET para crear soluciones robustas y eficientes. Nuestra colaboración ha resultado en la implementación de aplicativos críticos que satisfacen las necesidades en el marco de la ciberseguridad. Con una sólida formación técnica, mi habilidad para adaptarme y aprender distintos lenguajes y metodologías es una de mis mayores fortalezas.

Lo que realmente me motiva es el desafío constante de innovar y mejorar los sistemas existentes. Estoy comprometido con la excelencia y siempre busco maneras de aportar valor y eficiencia a través de la tecnología.

Experiencia

España

Backend Developer at Keyfactor (formerly Redtrust)

As a dedicated Backend Developer at Keyfactor, I specialize in creating robust and secure applications for the management and centralization of electronic certificates. With a strong focus on cybersecurity and cryptographic solutions, my work ensures the highest levels of data protection and integrity for our clients.

Key Responsibilities:

Development: Crafting and maintaining the backend infrastructure for our flagship application, designed to streamline the lifecycle management of digital certificates.

Cybersecurity: Implementing advanced security measures and encryption protocols to safeguard sensitive information.

Collaboration: Working closely with cross-functional teams to integrate security best practices into all stages of the development process.

Innovation: Continuously researching and applying the latest trends and technologies in cybersecurity and cryptography to keep our solutions ahead of the curve.

Achievements:

Successfully contributed to the development of a highly secure and scalable application that has become a cornerstone of our client's cybersecurity strategy.

Implemented key cryptographic modules that significantly improved the security posture of our application.

Played a pivotal role in ensuring compliance with industry standards and regulations, thereby enhancing our product's trustworthiness.

My passion for cybersecurity and cryptography drives me to constantly seek new challenges and opportunities to innovate. I am committed to delivering solutions that not only meet but exceed the security needs of our clients, ensuring their digital assets remain protected in an ever-evolving threat landscape.

SquarePoint

Programador informático

julio de 2019 - mayo de 2021 (1 año 11 meses)

Application Developer at Squarepoint

As an Application Developer at Squarepoint, I play a key role in our custom application development department, creating tailored solutions for both large enterprises and small businesses. My expertise in .NET C# development ensures that our applications handle significant data flows efficiently while providing robust first-tier support.

Key Responsibilities:

Custom Development: Designing and developing bespoke applications that meet the specific needs of our clients, with a focus on data-intensive solutions.

.NET C# Development: Leveraging the power of .NET and C# to build scalable, high-performance applications.

Data Management: Ensuring our applications efficiently process and manage large volumes of data.

First-Tier Support: Providing top-notch support alongside development to ensure seamless operation and quick resolution of issues.

HR Solutions: Specializing in creating applications that enhance human resource management, streamlining processes, and improving efficiency.

Achievements:

Successfully delivered multiple custom applications that significantly improved operational efficiency for both large enterprises and small businesses.

Developed and maintained applications that handle complex data flows, ensuring reliability and performance.

Provided exceptional first-tier support, reducing downtime and ensuring client satisfaction.

Created innovative HR solutions that have streamlined processes and improved resource management for our clients.

My role at Squarepoint allows me to blend my passion for development with my commitment to delivering high-quality, reliable applications that meet the unique needs of our clients. I am dedicated to staying current with the latest technologies and best practices in .NET development to continuously enhance our solutions.

ERP Module Developer at III

As an ERP Module Developer at III, I specialize in developing and enhancing modules for our company's proprietary ERP system. My role involves not only coding and implementation using Visual Fox Pro but also providing first-level support and maintaining direct contact with our clients to ensure their needs are met efficiently.

Key Responsibilities:

ERP Module Development: Designing, developing, and maintaining modules for our in-house ERP system using Visual Fox Pro.

Client Support: Offering first-level support, troubleshooting issues, and providing timely solutions to ensure client satisfaction.

Client Interaction: Engaging directly with clients to understand their requirements and deliver tailored solutions.

Optimization: Continuously improving existing modules to enhance performance and functionality.

Collaboration: Working closely with other departments to integrate new features and ensure seamless operation of the ERP system.

Achievements:

Successfully developed and deployed several ERP modules that have streamlined business operations and improved data management for our clients.

Provided exceptional first-level support, ensuring minimal downtime and high client satisfaction.

Maintained strong relationships with clients through effective communication and responsive service.

Enhanced the functionality and performance of existing ERP modules, leading to increased efficiency and user satisfaction.

At III, my focus is on delivering robust ERP solutions that drive operational excellence and meet the specific needs of our clients. My expertise in Visual Fox Pro and commitment to client support ensures that our ERP system remains a valuable asset for businesses.
